Textual Investigations

Screening sample: Screening sample

Staphylococcus aureus (MRSA) NOT isolated

If this patient has ever been MRSA positive, this result may not indicate eradication but merely suppression to below detectable levels. In this event, the use of any antibiotic NOT effective against MRSA, including for surgical prophylaxis, may encourage the regrowth of MRSA and lead to infection.

Clinical Information: Clinical Details: Order Comms Request

11 Mar 2024
Haemoglobin A1c level - IFCC standardised (XaPbt)
30 mmol/mol [20 - 41]

Take urgent same-day action if suspecting type 1 diabetes (HbA1c may be normal).
HbA1c is accepted for the diagnosis of type 2 diabetes in the UK, but should not be used to diagnose type 1 diabetes or in the following contexts:
childhood, pregnancy, renal failure, haemoglobinopathy trait, anaemia, HIV, abnormal red cell turnover or any recent treatment likely to affect glycaemia or red cell turnover.
From 03/04/2023 HbA1c analysis is now performed by capillary electrophoresis.

Textual Investigations

Clinical Information: Clinical Details: Order Comms Request
11 Mar 2024
Serum ferritin level (XE24r)
62.6 ng/ml [20 - 130]

11 Mar 2024
Clinical Information: Clinical Details: Order Comms Request
11 Mar 2024
Serum folate level (42U5.)
2 ng/ml [2 - 18.7]

Borderline folate level - possible folate deficiency
Please refer to WHO guidance on assessment of folate
status.

11 Mar 2024
Blood haematinic levels (XaDsm)

11 Mar 2024
Serum vitamin B12 level (XE2pf)
727 ng/L [197 - 771]

B12 levels are often lower in pregnancy and therefore
need careful clinical interpretation in such scenarios.
Suggest discuss with the consultant haematologist if
further advice is required.

Clinical Information: Clinical Details: Order Comms Request
11 Mar 2024
Serum total 25-hydroxy vitamin D level (Xabo0)
47 nmol/L

Vitamin D:
Levels <25 nmol/L suggest deficiency.
Levels between 25 and 50 nmol/L suggest insufficiency.
A high dose treatment or a low dose supplement may be
required based on patient's clinical status, bone
health and risk factors. If patient has hypercalcaemia,
avoid high dose replacement and consider appropriate
referral.

Radiology

27 May 2019

MRI of internal auditory meatus (X70oQ)

There has been slight increase in volume of the right vestibular schwannoma which has now extended into cisternal area. Normal left IAM. The remaining intracranial appearances are unremarkable.

Disease progression of R VS.

12 May 2020

CT of head (X70my)

Mastoid -: Mastoiditis ruled out

24 Sep 2024

Magnetic resonance imaging of cervical spine (X70pD)

Early degenerative disease.

30 Nov 2024

Chest X-ray (XE2az)

Heart and mediastinal contours within normal limits

Lungs are clear, no focal collapse, air space opacification, pleural effusion or evidence of pneumothorax identified

Bilateral breast implants noted

07 Dec 2024

MRI of internal auditory meatus (X70oQ)

Stable

Active Patient Plans
No information recorded

All Patient Status Alerts
General Consultation - Female
Long Term Condition Review
Telephone Consultation
Drug review required - Alert or monitoring

-

Drug review required - Annual review

-

On Corticosteroid (regular or high dose)

-

On HRT (in last 1y)

-

!!! Appointment Today / Tomorrow is for Annual Review !!!

1) Has had Flu Vac previously

2) No record of adverse reaction to flu jab

3) High dose steroid or immunosuppressant medication (details below)

5) Not on Anticoagulants

All obs up-to-date

Annual monitoring

Patients who require annual monitoring based on diagnoses, medication or patient specific monitoring, but don't have any long term condition requiring full review including bloods, e.g. Diabetes.

Criteria to show as completed:

All annual bloods / obs (not counting ACR) done in current QOF year

OR

Annual Review Completed code added in current QOF year

AR PINK - In Progress***

Patient has been invited for a review and has an appointment booked or they have responded to a questionnaire

Asthma

Asthma (+ meds issued in last 1y)

-

Asthma Review - please remember to bring your inhalers

Before your review appointment, please consider your answers to these questions:

1) In the past month how often have you had difficulty sleeping due to your asthma (including cough symptoms)?

2) In the past month, have you had your usual asthma symptoms (such as cough, wheeze, chest tightness, shortness of breath) during the day?

3) In the past month, has your asthma interfered with your usual daily activities (such as with your work, housework or exercise)?

4) During the past month, how often have you used your reliever inhaler (usually blue)?

5) How would you rate your asthma control during the past month?

Bloods / Obs for Medication Monitoring up-to-date

Some bloods / obs may be due but nothing that's essential for safe prescribing

This can be localised to insist all bloods/obs are up-to-date

BP

Carer Status

Chronic respiratory disease

HRT

Every 12m: BP, Weight / BMI

HRT Review

HRT Review coded or started in current QOF year

LTC Annual Review Reminder Required (invite sent in last 3m but not done yet)

-

Monitoring up-to-date

Patient monitoring up to date

Needs Annual Review prior to med review: currently in progress

Never Smoked

-

Record Incomplete

Some data in this patient record cannot be viewed due to sharing rules

REVIEW COMPLIANCE: Some repeat meds not issued in last 3 months

Third Party consent

Patient has given consent to share with a third party. Click on the icon to see the details of this share where available

Transgender Patients

Patient is transgender or has been seen in the gender clinic

Weight

You are due a Blood Pressure check as part of your annual review

If you own a BP monitor, please record a weeks' worth of readings in the table below (we need at least 14 readings), and bring it to your appointment. For more info about monitoring your BP: www.nhs.uk/conditions/blood-pressure-test/

Instructions:

1. In the morning, ensure that you are rested and have taken no exercise in the last 30 minutes.
2. Sit comfortably upright with your arm supported on a table beside you, with both feet on the ground.
3. Put the cuff on your upper arm (5cm above your elbow) resting on the table, the cuff should be roughly at the level of your heart.
4. Take two readings at least 1 minute apart and record below.
5. Repeat morning & evening for 7 days and bring to your appointment.

4.3 mmol/L [3.5 - 5.3]

22 Aug 2019

Serum creatinine level (XE2q5)

72 umol/L [45 - 84]

22 Aug 2019

Serum oestradiol level (4465.)

648 pmol/L

Adult female reference ranges 17B E2 (from 29.07.15)

Follicular phase 45-854

Ovulation phase 151-1461

Luteal phase 82-1251

Post menopause <18.4-505

NB: fulvestrant can cause positive interference in our oestradiol assay. Please contact the consultant biochemist if you need further clarification.

22 Aug 2019

Serum sex hormone binding globulin level (44CD.)

49 nmol/L [32.4 - 128]

22 Aug 2019

eGFR using creatinine (CKD-EPI) per 1.73 square metres (XacUK)

> 90 mL/min [60 - 200]

Multiply EPI e-GFR result by 1.159 for African-Caribbean patients.

Note that extremes of muscle mass and high protein diet can affect serum creatinine and e-GFR.

22 Aug 2019

Serum testosterone level (XE2dr)

0.3 nmol/L [0.29 - 1.67]

Please note revised testosterone ref range from 30.1.17

22 Aug 2019

Serum total 25-hydroxy vitamin D level (Xabo0)

35 nmol/L

Vitamin D is seasonal but levels should be >75 nmol/L at all times. Levels 50-75 are probably suboptimal, long term may lead to clinical effects. Consider safe sun exposure, diet, supplement. Levels 25-50 indicate deficiency, supplementation is indicated. Levels <25 suggest severe deficiency-may need pharmacological preparations- in which case serum calcium should be checked after 1 month. Toxic levels of vitamin D are not well defined but advise check serum calcium if 25 OH vitamin D exceeds 300 nmol/L and consider dose reduction if appropriate.

Please note new method in use as from 01.06.2018

02 Dec 2019

Informed consent given (XaLQR)

02 Dec 2019

Serum total 25-hydroxy vitamin D level (Xabo0)

52 nmol/L

Vitamin D is seasonal but levels should be >75 nmol/L at all times. Levels 50-75 are probably suboptimal, long term may lead to clinical effects. Consider safe sun exposure, diet, supplement. Levels 25-50 indicate deficiency, supplementation is indicated. Levels <25 suggest severe deficiency-may need pharmacological preparations- in which case serum calcium should be checked after 1 month. Toxic levels of vitamin D are not well defined but advise check serum calcium if 25 OH vitamin D exceeds 300 nmol/L and consider dose reduction if appropriate.

Please note new method in use as from 01.06.2018

Hi Sarah,

According to our records you are a carer. At this difficult time we wanted to let you know that should you need any additional support, please contact us. The practice would be grateful if you could complete the attached questionnaire and return to the surgery at your convenience so that we can see how best to support you both now and in the future.

Many Thanks

Hormone replacement therapy review (XaIKG)

Had to cease hrt pre and post op for gender reassignment surgery, has not been taking patches for around 5 months now. Is suffering with really bad hot flushes and mood swings, has just

recommended patches but aware it may take time to balance again. Aware can submit amgp at any point to discuss.

Was happy on current dose of patches before she had to stop them for surgery.

07 Feb 2022

Referral by GP (XaAZQ)

07 Feb 2022

Patient given advice (8CA..)

07 Feb 2022

Plan (XaIVg)

Also seen by Dr Okafor who felt lump, reassured that likely a cyst, but suggests referring back to ENT

referring to physio for knee

to get back in touch/111 if worsens in meantime

07 Feb 2022

Examination of ear, nose and throat (XE1i6)

hard lump behind the right ear around 2cm

bottom of lump feels fluid filled

no tenderness, no erythema, no warmth

small amount of wax inside right ear, looks healthy

crepitations felt and heard on extension and flexion of left knee

full ROM, no pain
07 Feb 2022
ENT symptoms (X75YP)

lump behind ear, been there for months
previous acoustic neuroma, had radiotherapy to that ear
series of ear infections since
sent to A+E in 2020, due to lump behind ear, mastoiditis ruled out by CT scan, given abx but
never helped, lump potentially been there since
seems to be increasing in size
no pain, unless touches it, then causes pressure sensation in ear, and pain radiates to top of
head
no fever
also noticed left knee cracking a lot when moving, no previous injury, however has been less
active recently
no locking, pain occurs whilst walking down stairs
both dad and sister also have problems with knees but unsure what their diagnosis is, states
they have seen physio for this

27 Jun 2022
Plan (XaIVg)

To go back on a low dose ICS inahler and prn salbutamol. For am and pm peak flow monitoring and follow up with results. I will ask and see re cream for vaginal hypergranulation but have also advised she contact gynea team as may need further silver nitrate which she is happy to do.

27 Jun 2022

Clinical examination (XB001)

Alert and orientated, speaking in full sentences

Chest - bilateral AE, no added sounds, no wheeze, good chest expansion. Coughing occasionally, unsure what colour sputum is. Says breathing improving

Observations in normal limits Advised against using her Mums medication as this potentially too strong for her.

27 Jun 2022

Clinical history and observations (X76sV)

Had childhood asthma which she thinks has come back

Has been using her Mums duoresp and salbutamol regularly

Also unable to get evorel patches anywhere so requesting a substitute if possible

Cream supplied by gynae surgeon she has run out of and requesting some more, was given this for hypergranulating tissue from her vaginal surgery

24 Aug 2022

Advice given about wound care (XaXUo)

24 Aug 2022

Plan (XaIVg)

Discussed with on call who is happy to issue further fucibet. Discussed with Dr OA who will review a gynae referral. It is unsure if Sarah will need to source a private gynaecologist or nhs due to her previous surgeon being based in Brighton, Previous surgeon has advised that at this point she should be able to be seen by a local gynaecologist.

Task created.

To update patient via accurx.

24 Aug 2022

Wound observation (Ua1d3)

History- Gender re-assignment surgery.

Since Sarah had a prolapse early 22, she has suffered with over granulation to an internal element of her vagina, fucibet cream has been applied sporadically when Sarah dilates.

On review today the right side of vaginal canal is overgranulated and more vascular. sarah will apply a small amount of fucibet for 14 nights and then get back in touch if any concerns.

The urethra is no longer visible, it is now fully submerged behind the middle "hammock like" skin fold that was designed to support the top aspect of the vagina and increase blood supply. When manipulated the urethra entrance is seen to be facing downwards at a 6pm angle this is causing urine to pool behind the "hammock" and increase risk of infection.

Asthma control questionnaire (XaQig)

Added in bulk

25 Jan 2024
Asthma monitoring call first letter (9OJ4.)
Added in bulk

23 Feb 2024
Erythrocyte sediment rate NOS (42B6z)

23 Feb 2024
Haemoglobin A1c measurement (Y1cbf)

23 Feb 2024
Free thyroxine level (4427.)

23 Feb 2024
Thyroid stimulating hormone (X80Gc)

23 Feb 2024
Liver function tests NOS (44DZ.)

23 Feb 2024
Urea and electrolyte observations (X771N)

23 Feb 2024
Blood folate NOS (42UZ.)

23 Feb 2024
Ferritin level (X76t9)

23 Feb 2024
Vitamin B12 level (X76tA)

23 Feb 2024
Full blood count NOS (424Z.)

23 Feb 2024
Test status (X74VU)

23 Feb 2024
Blood test requested (XaK6t)

23 Feb 2024
C/O - "tired all the time" (XM0D5)

23 Feb 2024
Laboratory test requested (413..)
tatt

23 Feb 2024
Vitamin D level (XaXhN)

23 Feb 2024
C-reactive protein level (X772I)

23 Feb 2024
Adjusted calcium (X80Cz)

26 Feb 2024
Patient breast aware (XaIS9)

26 Feb 2024
O/E - Diastolic BP reading (246A.)
72 mmHg

26 Feb 2024
O/E - Systolic BP reading (2469.)
114 mmHg

26 Feb 2024
Low risk of venous thromboembolism (XaXgG)

26 Feb 2024

Never smoked tobacco (XE0oh)

26 Feb 2024

Hormone replacement therapy review (XaIKG)

Can sometimes get a reaction from patch, happens every 6 patches.

Getting on well with the HRT, happy to stick with current treatment. No concerns expressed today.

26 Feb 2024

Assessment declined (XaZ1m)

06 Mar 2024

Patient given advice (8CA..)

06 Mar 2024

Advice to return if problem persists or deteriorates (Xabhl)

06 Mar 2024

Plan (XaIVg)

- 1) Clinical findings discussed with advice, education and SDM throughout
- 2) ICE addressed
- 3) Onward referral to physio
- 4) Sent exercises and advised on gentle heat, massage and stretches as well as posture advice

06 Mar 2024

Differential diagnosis (XSMiS)

Cx sp facet joint irritations and subsequent muscle imbalance

06 Mar 2024

Neck pain (XE1F4)

06 Mar 2024

Risk assessment (Ua1P1)

Absence of cervical specific red flags - No bilateral arm symptoms, dizziness, dysarthria, dysphasia, dysphagia, drop attacks, nystagmus, nausea or facial numbness, no severe headache, tinnitus or other visual disturbance

06 Mar 2024

Waited less than 2 weeks (Y0aa4)

06 Mar 2024

Examination of musculoskeletal structure (Xa2hh)

Chin poking posture

UL neuro - NTN

Cx sp AROM - stretch pattern L UFTS and scalenes.

Palpated L UFTS and scalenes - rep pain

Cx sp palpation C2-T1 - NTN

Massector mm hypertonic ?cause of TMJ pain

L shoulder AROm - flexion and abduction 90 degrees - limited by neural irritation left arm

06 Mar 2024

Musculoskeletal limb symptoms NOS (XE1Fs)

Pt consent obtained. ID checked.

HPC - L UFTS - mm feels tight started 1 year ago. Tinnitus started approx. 8/12 ago - feels pressure varies this. Feels happened when had covid and slept funny. Unable to look left at time. Facet joint irritation.

Feels sensation changes down left arm - medial aspect to elbow. No weakness in UL. Has been trying to do exercises at home.

Aggs - tinnitus worse throughout day.

Eases - massages, went to chiropractor (did not get on well) Heat helps temporarily

PMH - See records. NB. TMJ clicking.

SH - Works as carer - not physical. Computer based hobbies. 3D artist. Does not aggravate.

DH - nil pain meds.

06 Mar 2024

Informed consent given (XaLQR)

06 Mar 2024
Seen by first contact physiotherapist (Y281c)

06 Mar 2024
Consultation (Xa1qL)

06 Mar 2024
Referred by GP (XaJOS)

06 Mar 2024
E-mail sent to patient (Xalvi)

Dear Miss Leonard,
Please see below link for information and exercises to help. Remember to do gentle heat and neck stretches - increasing length of hold and intensity of hold gradually as tolerable.

11 Mar 2024

Monocyte count - observation (42N..)

0.77 $10^9/L$ [0.3 - 1]

11 Mar 2024

Lymphocyte count (42M..)

3.08 $10^9/L$ [1 - 3.6]

11 Mar 2024

Neutrophil count (42J..)

5.32 $10^9/L$ [2.1 - 7.4]

11 Mar 2024

Mean cell haemoglobin concentration (429..)

34.9 g/dL [32 - 35.9]

This value has been converted from: 349.0 g/L

11 Mar 2024

Mean cell haemoglobin level (XE2pb)

30.6 pg [26.9 - 33]

11 Mar 2024

Haematocrit (X76tb)

0.395 [0.347 - 0.445]

11 Mar 2024

Mean cell volume (42A..)

88 fL [81 - 97]

11 Mar 2024

Red blood cell count (426..)

4.51 $10^{12}/L$ [3.85 - 5.15]

11 Mar 2024

Platelet count - observation (42P..)
256 $10^9/L$ [150 - 400]

11 Mar 2024
Total white blood count (XaldY)
9.5 $10^9/L$ [4.3 - 11.2]

11 Mar 2024
Haemoglobin concentration (Xa96v)
138 g/L [117 - 149]

11 Mar 2024
Full blood count (424..)

11 Mar 2024
Erythrocyte sedimentation rate (XE2m7)
8 mm/hr [5 - 11]

11 Mar 2024
Serum TSH level (XaELV)
3.1 mIU/L [0.27 - 4.5]

11 Mar 2024
Serum free T4 level (XaERr)
15.1 pmol/L [11 - 23]

11 Mar 2024
Thyroid function test (X77Wg)

Please note that thyroid hormone, tumour markers, haematinics, hormone, troponin, HCG, BNP and digoxin assays may be subject to interference in patients receiving biotin therapy.

11 Mar 2024
Haemoglobin A1c level - IFCC standardised (XaPbt)
30 mmol/mol [20 - 41]

Take urgent same-day action if suspecting type 1 diabetes (HbA1c may be normal).
HbA1c is accepted for the diagnosis of type 2

diabetes in the UK, but should not be used to diagnose type 1 diabetes or in the following contexts:
childhood, pregnancy, renal failure, haemoglobinopathy trait, anaemia, HIV, abnormal red cell turnover or any recent treatment likely to affect glycaemia or red cell turnover.

From 03/04/2023 HbA1c analysis is now performed by capillary electrophoresis.

11 Mar 2024

Serum ferritin level (XE24r)

62.6 ng/ml [20 - 130]

11 Mar 2024

Serum folate level (42U5.)

2 ng/ml [2 - 18.7]

Borderline folate level - possible folate deficiency
Please refer to WHO guidance on assessment of folate status.

11 Mar 2024

Serum vitamin B12 level (XE2pf)

727 ng/L [197 - 771]

B12 levels are often lower in pregnancy and therefore need careful clinical interpretation in such scenarios.
Suggest discuss with the consultant haematologist if further advice is required.

11 Mar 2024

Blood haematinic levels (XaDsm)

11 Mar 2024

Serum total 25-hydroxy vitamin D level (Xabo0)

47 nmol/L

Vitamin D:

Levels <25 nmol/L suggest deficiency.

Levels between 25 and 50 nmol/L suggest insufficiency.

A high dose treatment or a low dose supplement may be required based on patient's clinical status, bone health and risk factors. If patient has hypercalcaemia,

avoid high dose replacement and consider appropriate referral.

Monitoring status (XaBUo)

16 Jun 2025

Plan (XaIVg)

trial fexofenadine 120mg to determine if dry mouth sx resolve

s/n adv given, pt happy with plan

16 Jun 2025

Medication requested (8B3H.)

Tel c/w patient to discuss reason for requesting alternative to fexofenadine 180mg, reports been getting dry mouth for last couple of weeks, which started recently after 3 months of use. discussed various options, has tried OTC but no benefit, avoids eye drops as reacts to them, using nasal spray but cannot name which. self care adv given how to reduce risk of s/e symptoms etc, drink more water, s/f chewing gum, saliva substitute etc agreed trial of fexofenadine 120mg daily to see if symptoms improve on lower strength. Patient advised to return for GP review if dry mouth persists or worsens to consider alternative options.

Summary Care Record Update

16 Jun 2025 09:45

Surgery: Ms Rukshana Mahmood (Pharmacist)

Telephone consultation (Xalge)

Medication requested (8B3H.)

Tel c/w patient to discuss reason for requesting alternative to fexofenadine 180mg, reports been getting dry mouth for last couple of weeks, which started recently after 3 months of use. discussed various options, has tried OTc but no benefit, avoids eye drops as reacts to them, using nasal spray but cannot name which. self care adv given how to reduce risk of s/e symptoms etc, drink more water, s/f chewing gum, saliva substitute etc
agreed trial of fexofenadine 120mg daily to see if symptoms improve on lower strength.
Patient advised to return for GP review if dry mouth persists or worsens to consider alternative options.

Plan (XaIVg)

trial fexofenadine 120mg to determine if dry mouth sx resolve
s/n adv given, pt happy with plan
Fexofenadine 120mg tablets - 30 tablet - take one daily for hayfever symptoms
ETP2 FP10: Not Yet Printed - Signed
